PROBLEM SOLVING METHODOLOGY

Analysing & Reasoning:

Few questions in examination are based on analyzing and reasoning. Free internet access in the library and wifi facilities in campus promotes the habit of self learning and discussion. Faculties prepare online quiz for students after the completion of each unit with the help of GOOGLE FORMS.

The screenshot shows a Google Form interface. At the top, there are navigation tabs for 'Questions', 'Responses' (with a count of 12), and 'Settings'. The form title is 'M. Pharmacy II Semester II Mid Online Exam'. Below the title is a text area for 'Modern Pharmaceutics-II'. The form includes several input fields: 'Name *' (Short answer text), 'Hall ticket No *' (Short answer text), and 'Example of Chlorofluorocarbons *' (Multiple choice). The 'Example of Chlorofluorocarbons *' field has a radio button selected for 'Propellant 11'. On the right side of the form, there are icons for adding questions, changing the theme, and other settings. At the bottom right, there is a 'Send' button.

Student response for online exam

Research Activities:

Research activities are conducted in each Department under the guidance of senior faculty where the students of different semester get knowledge about emerging area and help them to promote in Research aptitude. The third and final year students are encouraged to get acquainted with reading & understanding research papers and technical terms given in quality literature and understand its implementation in emerging technologies and recent
