Report on Awareness protection of Water Resources

Date: 20-03-2024

Time: 10.30 AM

Venue: Narayana Pharmacy College, Nellore.

Narayana Pharmacy College conducted Awareness program on “protection of water resources” on 20-03-2024. Principal Dr.S.Sujatha, addressing the gathering. She said that Water covers over 70% of the Earth's surface, but less than 1% of it is fresh and accessible for human use. This small fraction is what sustains our ecosystems, agriculture, industries, and ultimately, our survival. Yet, despite its vital importance, our water resources are under immense threat due to pollution, over-extraction, and climate change. Over 25 students along with staff participated in the program.

Mrs.V.Prathyusha delivered a valuable speech on the Challenges We face

1. **Pollution:** Industrial waste, agricultural runoff and improper disposal of chemicals and plastics have severely contaminated our water bodies. This pollution not only affects aquatic life but also poses health risks to humans.
2. **Over-Extraction:** The excessive extraction of groundwater for agriculture and urban use is depleting our aquifers faster than they can recharge, leading to long-term shortages and ecological imbalances.
3. **Climate Change:** Altered weather patterns, more frequent droughts, and erratic rainfall are impacting the availability and distribution of freshwater resources, exacerbating existing water scarcity issues. She also explain about what we are going to do
