1. Purpose

The purpose of the Energy Policy at Narayana Pharmacy College is to promote energy conservation, reduce carbon emissions, and enhance the energy efficiency of college operations, contributing to a sustainable future.

2. Scope

This policy covers all aspects of energy use within Narayana Pharmacy College, including lighting, heating, cooling, equipment, and transportation. It applies to all buildings, facilities, and activities conducted by the college.

3. Policy Making

The Energy Policy is developed by the Energy Management Committee, which includes faculty, staff, and student representatives. The committee is responsible for setting energy conservation targets and developing strategies to achieve them.

4. Effective Measures

- **Energy Audits:** Conduct regular energy audits to identify areas for improvement and implement energy-saving measures.
- **Energy-Efficient Equipment:** Invest in energy-efficient equipment and technologies to reduce energy consumption.
- **Renewable Energy:** Explore and implement renewable energy sources, such as solar panels, to supplement the college's energy needs.
- **Behavioral Changes:** Promote energy-saving behaviors among staff and students through awareness campaigns and training.
- **Building Design:** Incorporate energy-efficient designs and materials in new constructions and renovations.

5. Implementation

The implementation of the Energy Policy involves:

- **Energy Management Committee:** Overseeing the implementation of the policy and coordinating energy conservation activities.
- **Energy Monitoring System:** Establishing a system to monitor energy usage and track progress towards energy conservation goals.
- **Training and Education:** Providing training for staff and students on energy-saving practices and technologies.
- **Incentive Programs:** Developing incentive programs to encourage energy-efficient practices among the college community.

6. Problem Solving

Addressing energy-related issues involves:

- **Energy Conservation Plans:** Developing detailed energy conservation plans with specific goals and timelines.
- **Stakeholder Engagement:** Engaging with stakeholders, including utility providers and government agencies, to support energy conservation initiatives.
- **Continuous Improvement:** Regularly reviewing and updating the policy and practices to incorporate new technologies and methods.

7. Responsibility

The Energy Management Committee, led by an appointed Energy Coordinator, is responsible for the execution and oversight of the Energy Policy. All college members are expected to adhere to the policy and contribute to energy conservation efforts.

8. Evaluation

Periodic evaluations will be conducted to measure the success of energy conservation measures and make necessary adjustments to ensure the continuous improvement of energy efficiency at the college.

By adhering to these policies, Narayana Pharmacy College aims to create a sustainable and environmentally responsible campus, setting an example for students and the community.
